Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
College of Agriculture
Madison 6, Wisconsin

Dear Dr. Lederberg:

I am becoming serologically interested in some of your parent and bacteriological lines, especially a line where there is marked biochemical variation.

May I have transplants of your *E. coli* K12 and the lines established from this culture, Y-40, Y-53, 58-161, W-677. I trust the cultures we sent you last week have arrived in good condition. If any were broken, let us know, and we will replace them.

Sincerely yours,

castuart

C. A. Stuart
Professor of Biology
